Summary

I'm a Junior Full-Stack Engineer focused on problem-solving and building reliable web applications across frontend and backend systems. I enjoy learning and applying new technologies, writing clean and maintainable code, and developing practical solutions through hands-on projects and effective teamwork.

Technical Skills

- **Programming Languages:** Java, JavaScript, TypeScript
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS
- **Frontend:** HTML5, CSS3, Tailwind CSS, React.js, Next.js
- **Backend & Databases:** Node.js, Express.js, REST APIs, JWT, OAuth, MongoDB, MySQL
- **Tools:** Git, GitHub, Postman, VS Code, Vercel

Education

Government College of Engineering, Tirunelveli

B.E. in Computer Science and Engineering – CGPA: 8.4

Sep 2023 – May 2027

Tirunelveli, TamilNadu

Rose Mary Mat. Hr. Sec. School

Higher Secondary Education – 96%

Jun 2020 – Apr 2023

Tirunelveli, TamilNadu

Experience

Zavorel Technologies

Jun 2026 – Jul 2026

MERN Stack Developer Intern

- Developed responsive frontend modules for a role-based drone management portal using React.js, Tailwind CSS, Redux Toolkit, and Axios.
- Integrated RESTful APIs for authentication, dashboards, and user management to enable seamless frontend-backend communication.
- Implemented UI enhancements, resolved application bugs, and collaborated with the development team to improve usability and maintainability.
- Contributed to a production-grade drone management portal supporting role-based access, mission tracking, and operational workflows.
- **Product:** Ailwing UDMS (User Drone Management System)

CyberDude Networks Pvt. Ltd.

Sep 2023 – Feb 2024

JavaScript Fullstack Engineer Intern

- Completed intensive training in the MERN stack and applied the concepts by building full-stack web applications.
- Developed full-stack web applications using modern JavaScript technologies.
- Applied RESTful APIs, CRUD operations, Git-based version control, and component-based architecture in full-stack projects.
- Collaborated in a team hackathon to develop a job portal, securing **3rd Place** by delivering complete CRUD functionality within the project timeline.
- **GitHub:** github.com/danielace1/cyberdude-challenges

Projects

AI Interview Mocker | *Next.js, React.js, Gemini AI, Drizzle ORM, NeonDB*

GitHub | Live

- Built an AI-powered interview platform to help users practice technical interviews through realistic mock sessions.
- Integrated Gemini AI to generate interview questions and provide automated feedback based on user responses.
- Implemented secure authentication and persistent interview data management using Clerk, Drizzle ORM, and NeonDB.

Quiz Craze – Online Quiz Platform | *React.js, Firebase, Tailwind CSS, Groq AI*

GitHub | Live

- Developed a role-based quiz platform enabling educators to create assessments and students to participate in timed examinations.
- Implemented authentication, quiz management, leaderboards, result history, and AI-powered quiz generation using **Groq AI** and Firebase.
- Built responsive interfaces and optimized state management to deliver a consistent user experience across devices.

MeetSync – Event Scheduling App | *React.js, Node.js, Express.js, MongoDB, Google Calendar API*

GitHub | Live

- Developed an event scheduling platform by integrating Google Calendar API for streamlined meeting management.
- Integrated Google OAuth authentication and automated event creation, updates, and Google Meet link sharing.
- Built responsive frontend interfaces and backend services to provide a secure and reliable scheduling experience.
